Commission #2

Commission is a percentage of the product sale price. If a product sale price is $100, and the commission is 10%, a salesperson will get $10 in commission. Find out the commission of each salesperson below.

1. Today Troy sold a $500 flat screen television and a $600 refrigerator. The commission for selling a television is 2% and 3% for selling a refrigerator. How much commission did Troy earn today?

2. Peter sold two cars today. The red car costs $10,000 and he will get 1% commission. The blue car costs $12,000 and he will get 2% commission. How much commission will Peter get from selling these two cars?

3. Donna sold a boat. The price is $50,000. Her commission is 0.1%. How much commission will she get?

Challenge

Rosie sold an emerald necklace that cost $7,500 and she will get 1% commission. She sold ruby earrings that cost $2,000 and she will get 4% commission. Which piece of jewelry gives her more commission?
